

Airsafe

■ 8-inch Shallow Base

■ SB-08

Compliance with Standards

FAA: AC 150/5345-46, AC 150/5345-42
AC 150/5345-42G
Chinese National Standard: GB/T 7256-2005

Application/Use

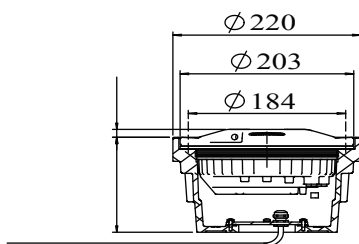

Installation of 8-inch in-pavement lighting fixtures

Features

- Forge forming with high quality aluminum alloy;
- Forging process makes interior structure of material denser, good mechanical performance;
- Special material formula, excellent thermal conductivity;
- Reasonable structure design, uniformly forced, not easy to deformation;
- High precision machining, to ensure overall quality and precision of shallow base;
- Antiseptic treatment on surface with good anti-corrosion property, more durable;
- Premium metal water joint, good waterproofing;
- Screw holes with stainless steel thread sleeve, in order to prevent aluminum alloy threaded hole from losing;
- Two openings bi-directionally and double openings in single direction, easy to install;
- Enough large space, to protect internal cable from squashing by light;
- Solid material, to ensure shallow base long-term and reliable use after embedding into pavement.

Dimensions

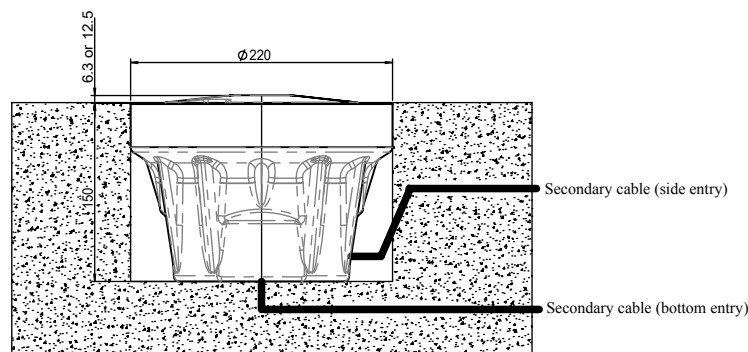

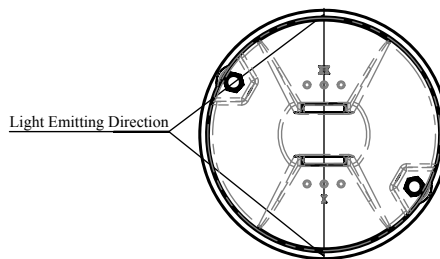

Net Weight: 3.03kg
Packing: 240*240*160 mm³
Order reference: 827131 (for side entry type)
827132 (for bottom entry type)

Order Information

8-inch Shallow Base _____ SB-08-X
Wiring Pattern _____
S = side entry
B = Bottom entry
Note: other wiring patterns ordered upon request

Installation

SB-08
